

快递接口说明书：

1 接口网址：

<http://www.kuaidi100.com/autonumber/autoComNum>

2 输入快递号 作为参数拼接到网址，关键字text=快递号 例如：

单号：227728570825

<http://www.kuaidi100.com/autonumber/autoComNum?text=227728570825>

3 使用requests模块的get请求获取内容

4 得到的内容如下：

```
{"comCode":"","num":"227728570825","auto":  
[{"comCode":"shentong","id":"","noCount":  
2682,"noPre":"227728","startTime":""}]}
```

5 通过观察发现 key=auto的列表里面 comcode的value值为shentong，即为需要的快递公司

6 通过拼接网址：type=shentong 承运公司

postid=227728570825 快递单号

拼接结果：

单号：227728570825

<http://www.kuaidi100.com/query?type=shentong&postid=227728570825>

7 返回结果为json字符串 解析json字符串获得物流情况

例如：

```
{"message":"ok","nu":"227728570825","ischeck":"1","condition":"F00","com":"shenton  
g","status":"200","state":"3","data":[{"time":"2017-07-09
